

GLASDEC

GLASSWARE + DECORATION

ABOUT US

At Glasdec, we're focused on glassware.

Whether you're setting up an exciting new venue, refreshing your glassware range or require a logo on your glassware, we can help.

A family owned business operating since 1985 you benefit from our considerable knowledge and expertise about glassware and decoration of glassware.

Our products are commercial quality and our brands are from the leading glassware manufacturers.

With a team of dedicated staff we offer personalised service and expert advice on glass suitability and handling. Contact us or call into our Preston showroom to browse our glassware displays and enjoy a coffee while we help with your selection and discuss your branding requirements.

Our decoration process provides a durable and high quality finish.

Using traditional screen printing methods and custom made glass printing machinery we are able to efficiently hand print a wide range of glassware. We print with organic inks that are specifically manufactured for stress resistance during wash cycles and resistance to chemicals used in the wash process. After the printing process glassware is fired in a temperature controlled lehr oven to cure the decoration for durability.

Our focus on supplying the hospitality, wine, beer and promotional industries means we take exceptional care in preparing, printing and packing your glassware. We can print basic or more complex designs and position the logo to meet your required pour guide specifications.

BRANDS

Arcoroc offers an extensive range of innovative, functional, high-quality products.

Italy's largest glass manufacturer of stemware, tumblers, decanters, dessert, tea and coffee.

Offering designs that respect the art of French living that meet performance and presentation satisfaction.

Crown Glassware has built a long history and established a strong reputation for offering quality glassware.

Durablex glass is made from an industrial patent for moulded, tempered glass, developed.

Libbey has been a leading distributor of glassware, providing a wide selection of durable and elegant products to suit your many needs.

Premium glassware focused on great design, Italian craftsmanship and cutting edge technology, the Luigi Bormioli range has a glass for all occasions.

When it comes to precision and contemporary glassware, Nude offers a complete solution for the hospitality industry.

One of the world's leading glassware manufacturers, providing an extensive range of quality glassware for over two decades.

Stunning crystal and glass produced in Turkey and one of the largest glass producers in the world with a reputation for excellence.

Virtually unbreakable, durable and reliable Polysafe is made from the highest quality food grade polycarbonate.

RCR is 100% Made in Italy, from product design to engineering and construction of moulds.

Royal Leerdam stands for a powerful combination of elegant design and functional details.

Glassware that is produced to a high standard of quality, design and durability that offers a glass for every taste and occasion.

Schott Zwiesel creates modern designs with premium applications, reflecting the latest global trends.

Our designers create glasses that are striking yet simple, perfectly balancing proportion, form and function.

Stölzle's dedication to understanding and refining the process of producing high quality glassware has resulted in a superior collection.

This unique range offers a combination of a 100% recyclable drinkware option that is stackable.

MATERIALS

Certified

Tempered glassware will break under strong shock, but it will resist breaking into large pieces that could cause severe injury. Legislative requirements now force particular venues to use tempered glass where glassing incidents have occurred. Our tempered range assists you being able to service these venues effectively.

Effervescence Point

Discrete effervescent points which are laser etched at the inside base of the bowl to improve the presentation and longevity of the bubble stream. These points help to encourage the gas to separate at the base of the bowl, which in turn causes the bubbles to spiral upwards through the full length of the wine in the glass.

Nucleated

A laser etch or sand blasting on the inside bottom of selected glasses creates a constant stream of bubbles, enhancing aroma and flavor.

Pour Line

We offer a diverse range of glasses with pour lines. This will greatly improve portion control within venues for 'wine by the glass' transactions.

Safedge Rim

Libbey's proven commitment to quality has been backed by our well-known guarantee. If the rim of any glass covered by the Safedge guarantee chips, Libbey will replace or refund the price of the glass when it is returned to the dealer / distributor from whom it was originally purchased.

Safedge Rim & Foot

If the rim or foot of any one-piece stemware item chips, Libbey guarantees to replace or refund the price of the glass when it is returned to the dealer / distributor from whom it was originally purchased.

Sheer Rim

"Sheer Rim" is a technology that allows glasses to have an extremely fine rim which results in optimal comfort on the lips during tasting.

Tempered

In order to increase the life of products by 10 to 15 times, The tempering process provides products with excellent resistance to heat, mechanical shock and glass safety.

GLASS HANDLING

Correct handling of your glassware will help to minimise breakages. Below are some reasons why glassware breaks and recommendations for glassware care.

THERMAL SHOCK

Thermal shock can occur when glassware is subjected to extreme temperatures. Transitioning from one temperature to another puts a stress on the glass and may cause it to crack or break.

To prevent thermal shock, allow glassware to come to room temperature and don't use directly from the glasswasher. Avoid putting cool liquids or ice in warm glasses. Have enough stock on hand to allow for the glassware from the glasswasher to cool before use.

MECHANICAL SHOCK

Mechanical shock in glassware is the direct result of contact with another glass or other item such as an ice scoop or bottle when pouring. This contact can cause a minute abrasion, invisible to the eye, but a source of weakness in the glass that makes it more susceptible to breakage from impact or thermal shock.

GLASS HANDLING

WASHING

1. Remove damaged glassware from service to prevent it breaking in the glasswasher.
2. Check the temperature of the glasswasher water regularly.
3. Clean the glasswasher's filters, helix and pipes regularly.
4. To avoid breakage during the wash cycle, place glasses so they do not touch each other. We recommend using compartment glass washing racks.
5. Always use a non-abrasive cleaner.
6. Allow glasses time to cool before handling them.
7. Hold stemware by the stem (not the foot) and avoid twisting the base and the bowl in opposite directions when polishing.

SERVICE AND STORAGE RECOMMENDATIONS

1. Store glasses in racks or boxes with compartments
2. Only stack glasses that are designed to be stacked.
3. Avoid allowing the bottle to touch the rim when pouring.
4. When servicing ice do not allow the scoop to connect with the rim of the glass. Do not use the glass to scoop ice.
5. Never let a glass touch the tap or dispenser when pouring beverages.
6. Slowly pre-heat glasses that will hold hot beverages.
